REMARKS/ARGUMENTS

Claim 1 has been amended to provide antecedent basis for "said data representing said

game selection" by amending the claim to include the following: "said controller of said website

server being programmed to receive data representing a game selection from said one remote

player device". No new matter has been added that would require an additional search or

examination.

Claim 22 has been amended to correct a typographical error. Namely, to delete a comma

between "said" and "remote" in line 9. No new matter has been added that would require an

additional search or examination.

Conclusion

It is believed that this Amendment still places the above-identified patent application into

condition for allowance. Early favorable consideration of this Amendment is earnestly solicited

and Applicant respectfully requests that a timely Supplemental Notice of Allowance be issued in

this case. If, in the opinion of the Examiner, an interview would expedite the prosecution of this

application, the Examiner is invited to call the undersigned attorney at the number indicated

below.

Respectfully submitted,
